

## Claims

1. A hand hair dryer (1) having an electric fan (2) and an electric heater (3), located in line with it, for generating an air stream (4) from a barrel portion (5), in which the fan (2) is located in a housing portion (6) and the heater (3) is located  
5 inside the barrel portion (5), that on the housing portion (6), a first handle grip (8) that has operator control elements (7) is located at an angle of approximately 90° to the barrel portion (5), characterized in that the barrel portion (5) is embodied as a second handle grip (9).

2. The hand hair dryer in accordance with claim 1, characterized in that the  
10 second handle grip (9) is embodied as heat-insulated.

3. The hand hair dryer in accordance with claim 1, characterized in that the barrel portion (5) is embodied as heat-insulated from the outside.

4. The hand hair dryer in accordance with claim 1, characterized in that the second handle grip (9) and the barrel portion (5) are embodied as heat-insulated  
15 from the outside.

5. The hand hair dryer in accordance with claim 1, characterized in that the second handle grip (9) is shaped cylindrically.

6. The hand hair dryer in accordance with claim 1, characterized in that the first and second handle grips (8, 9) are each provided with a nonslip surface (13).

7. The hand hair dryer in accordance with claim 1, characterized in that a first cold air switch (10) is located on the first handle grip (8), and a second cold air switch (11) is located on the second handle grip (9).

8. The hand hair dryer in accordance with claim 1, characterized in that a commonly actuable first or second or third cold air combination switch (16, 16.1, 16.2) is located between the first handle grip (8) and the second handle grip (9).

9. The hand hair dryer in accordance with claim 8, characterized in that a pushbutton (17) is provided as the first cold air combination switch (16).

10. The hand hair dryer in accordance with claim 8, characterized in that a one-legged toggle switch (18) is provided as the second cold air combination switch (16.1).

11. The hand hair dryer in accordance with claim 8, characterized in that a two-legged toggle switch (19) is provided as the third cold air combination switch (16.2).

12. The hand hair dryer in accordance with claim 1, characterized in that a centrally located warm-air conduit (28) and a coaxial cold-air conduit (29) are

provided in the barrel portion (5), and the central warm-air conduit (28) is formed by a hollow-cylindrical barrel (30), in which the heater (3) is located; that the coaxial cold-air conduit (29) is formed by the barrel portion (5) and the central warm-air conduit (28); that the central warm-air conduit (28) and the coaxial cold-air conduit (29) are acted upon by a cold air stream (31) of the fan (2), and by means of the heater (3), a warm air stream outlet (32) is effected out of the central warm-air conduit (28), and a cold air stream (33) is effected from the coaxial cold-air conduit (29).
